Services for RUCKUS One™

By RUCKUS® Professional Services

RUCKUS One is an AI-driven network assurance service delivery and business intelligence platform.

RUCKUS PS has services to aid those new to the RUCKUS One platform.

The following services are available:

Controller migration

RUCKUS Professional Services offers migration services for the legacy ZoneDirector™ (ZD) and SmartZone™ (vSZ/SZ) based wireless networks moving to the new RUCKUS One platform. Older code versions and end-of-life products can make migrations challenging. RUCKUS Professional Services specializes in these types of migrations. We can take the worry away and give you your time back. [Learn More]

Business Intelligence & Analytics

Your RUCKUS One subscription includes powerful business intelligence & analytics capabilities. RUCKUS Professional Services offers an Analytics White Glove Service that will provide your IT staff with deeper understanding on how to customize charts & reports. Armed with dashboards tailored for your network environment, you will get to solving problems quickly and economically. [Learn More]
