

HOW TO ENROLL:

To enroll in the CPA 200 course, from CommScope University, register [here](#). If you prefer to place an order for this course using a Purchase Order, we kindly ask you to reach out to your authorised RUCKUS Partner. You can order the course by referencing SKU **905-TVIR-CPA200**.

DURATION:

3 Days

PREREQUISITES:

Knowledge of the following concepts are strongly suggested:

- RUCKUS RWF 100 - Ruckus Wireless Fundamentals course
- RUCKUS products and technologies
- Basic knowledge of the Wi-Fi onboarding process
- Basic knowledge of authentication protocols

DESCRIPTION:

This course is designed to prepare students in the configuration, administration, and maintenance of the RUCKUS Cloudpath enrollment system. Technologies that comprise Cloudpath are discussed along with the ability to provide a scalable, easy to deploy, and secure enrollment solution. Topics also include use cases and deployment examples to guide students in effective administration of the Cloudpath features.

OBJECTIVES:

Upon successful completion of this course, the student should be able to:

- Describe Cloudpath features and the solutions it provides
- Discuss purpose and roll of certificates and PKI protocols in the Cloudpath solution offers
- Discuss the creation of workflows for company managed, BYOD, and guest access
- Discuss onboarding results that provide certificate install, Dynamic Pre-shared Key (DPSK) generations and MAC registration to client devices
- Describe the UI interface personalization and branding in Cloudpath
- Configure various Network Access Control (NAC) policies for client, device, and access types providing unique policy enforcement
- Deploy onboarding workflows at multi-location environments
- Describe Cloudpath upgrading process
